**Center of Excellence for Teaching and Learning,
and Dr. Stephen Hegedus, Dean College of Education**

From far reaching impacts of COVID-19 to environmental and economic concerns we are living in an age of complexity that will likely be with us for generations to come. How then can schools and organizations change their learning environments to foster innovative thinking in students when the age of complexity is always at the forefront? In this presentation Peter will share three foundational imperatives and four supporting conditions that can help awaken the seeds of brilliance that lie in everyone. He will illustrate this with stories and videos where people are indeed making the extraordinary happen and, in so doing, changing lives.
